

## Webhook Notification Setup

### WEBHOOK URL REQUEST

Kindly share the following details with us:

- Your **Webhook URL**
- A **Username**
- A **Strong Password**

Please ensure that **Basic Authentication** is implemented on your notification endpoint using the same credentials shared with us.

We will expect webhook responses in the format below:

### WEBHOOK URL RESPONSE

```
{  
  "success": true,  
  "status": "success",  
  "code": "00",  
  "message": "Acknowledged"  
}
```

Additionally, kindly share your **Basic Auth credentials** securely. Please do **not** leave passwords in plain text.

---

## Guidelines for Completing the Test Scripts

1. Kindly complete the **last three columns**.
2. **All test cases are expected to pass.**
3. Test cases that are not implemented should be marked as **“N/A”**.

---

## Important Note

Upon completion of the test scripts:

- The executed copy must be **signed by at least two signatories** from your team.
- Ensure the **Engineer / PM / QA details** at the top of the document are properly filled.
